Effects and the Problems

Effects your students have gained	Points for further improvement
The students knew few traditions about the “Dia de los Muertos”, many of that traditions are unknowd for them. They do the research to choose the images for draw, and they knew a little bit of their cultural traditions. Also, we learn about the cultural traditions and legends of Japan. The students was so happy, it was a great experience for them and for the entire school	We really like to participate in this international project, it was our 4 rd time, but it’s our firs with Tagara High School school. We work with a different group of students than last year, and their really happy and excited to participate. We have some difficulty in the communication with our partners, but we think it was and interesting and enriched experience for the students. The language it was a challenge too. But all the experience was incredible.

How has your impression toward your partner country and/or the world changed?

Change in student’s impression	Change in teacher’s impression
The students had a great experience with this job, because they never work with students in another country, with different ideas, culture and customs.	This was a different work with the students, so the form to work was different, closer whit them and I could knew to my students in another way.
