### # Effects and the Problems

Effects your students have gained	Points for further improvement
The students experienced the traditional ceremony and it was their first time to participate it. They spent lots of time to do the research. I am happy they know more about our traditional culture, history and the deep meaning from this project. Also, we learned a lot of Japanese culture and different festivals from our partner. We had a great experience!	It was our first time to join this international project and it was also the students' first time to make friends abroad. For us, everything is new and unknown. Besides, it was a little difficult to have the video conferences because the equipment ( at first time). Using whole English to discuss the topic is also a challenge for us. Nevertheless, we did it. Thanks for my dear partner.

### # Have you made your activity open in your school or in your local area? How was their reaction or reputation?

PR you did inside/out of your school	Reaction/reputation from around
We informed the local media of our exchange and we were in the local paper. We also hang our mural on our building and the students are the guide to introduce the story to the other students.	The students thought it was a very cool activity and they loved to have a video conference with their Japanese partners. They had a great experience last semester.
